

STEF SELF LEVELING

1-DESCRIPTION

Stef Self Leveling is a cementitious, well-balanced blend of selected aggregates, cement and a synthetic polymer resin to give increased toughness and bond properties. This is a three component polyamide cured solvent free self leveling. It is a robust high performance product. It is an extreme high build. It is specially designed as a superior abrasive and impact resistant leveling for areas with extreme wear and tear. Can be used as mid coat or finish coat.

2-USES

Stef Self Leveling is used as a rapid fast-setting over rough concrete floors to repair damaged areas due to poor finishing or for general leveling .Just mix and pour.
Can be installed from 3mm to 4cm thick in a single pour.

3- SURFACE PREPARATION

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

4-MIXING

1-Into a clean mixing container .add 5 to 6 liters of cool,clean water.
2-Add 20 kg of Stef Self Leveling powder while slowly mixing with an egg-beater mixer and electric drill.Once all powder has been added to the water,mix at a high speed for 2 minutes.
